Understanding Your Child's Brain

- Does your child not fit into the educational box?
- Does your child seem to be learning differently?
- Does your child not enjoy school?

Explore different learning styles, identify how your child learns best and how their brain functions. Gain strategies to support your child's learning journey and the partnership between home and school.

Discussion will focus on the primary school years.

Wednesday 15 May 2024

6.00pm - 8.00pm

Maddington Community Centre
19 Alcock Street, Maddington

TURN ME
OVER!

Guest Speaker: Chelsea Horner

Chelsea Horner's life purpose is to inspire people to unleash their potential. She is a qualified high school educator, educational speaker and mother of three. She is a licensed In8model Practitioner and is currently studying a Master of Education at Curtin University as she continues to work in high school education.

Chelsea's experience in education extends beyond her decade of experience in the classroom into executive roles. She also provides consultation for executive staff and school boards in the public and independent education sector. She has worked in the non-profit sector developing and coordinating mentoring programs for disadvantaged children in local primary schools.

Chelsea presents a variety of presentations and workshops in an interactive, engaging way. She communicates the in8model for application in education to create sustainable change where educators are empowered to create learning environments that facilitate positive lifelong learning for all students.

What others are saying about Chelsea:

Senior Teacher, Perth WA:

'Unpacking the quadrants of the brain and how they relate to learning was most interesting. Lovely presentation – fast flowing, informative and easily related to real situations. It was great!'

Teacher, Carnarvon WA:

'I enjoyed learning about the quadrants and how they link to the behaviours in our classes. A really, really great presentation. I was engaged the whole time.'
